PORTFOLIO PROJECT

Pattern Shop QR Scanner

Scan a pattern QR code to find it and update its record from the shop floor.

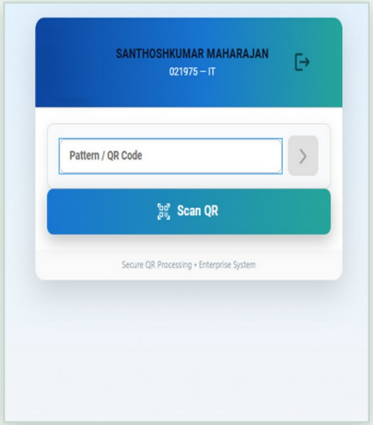

Scan. Find. Update.

Paperless pattern control

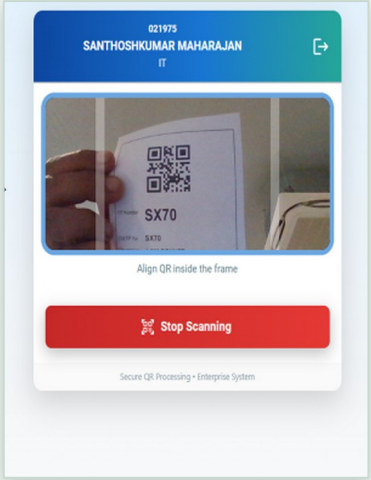

Santhoshkumar | IT

HOW IT WORKS

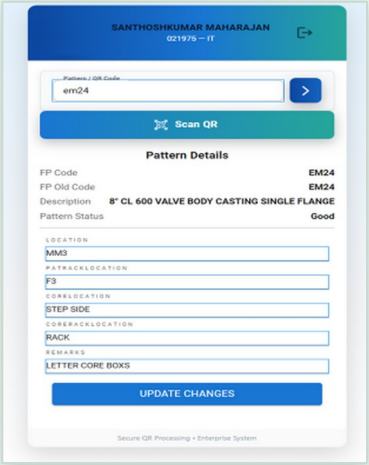

Scan, check, update

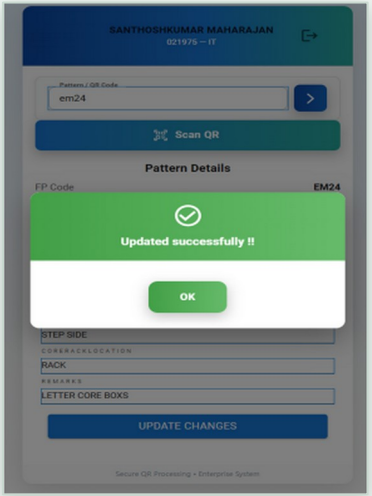

1 Scan QR

2 Align the code

3 Pattern details

4 Updated

SPEED AND EFFICIENCY

Pattern traceability

BEFORE: MANUAL EFFORT

~100 min / day

spent tracing patterns

- About 1 minute to trace each pattern
- 100+ patterns every day
- Heavy dependence on manual search and operator effort

AFTER: QR-ENABLED TRACKING

In seconds

to locate a pattern

- Instant pattern identification by QR scan
- Zero search time
- Effortless tracking across the shop floor
- About 100 minutes a day saved

ACCURACY AND REAL-TIME CONTROL

Pattern master update

BEFORE: MANUAL PROCESS

Paper first

system updated later

- Pattern details and location noted on paper
- High risk of errors and missing data
- No real-time view of pattern condition

AFTER: DIGITAL WITH QR SCANNER

Real time

updated from the shop floor

- Direct system update using QR scan
- No delay, no backlog
- Completely paperless
- Instant status update: Good / Bad

SUMMARY

Faster, accurate, paperless

~100 min saved daily

Patterns are located in seconds, not minutes.

Real-time updates

Records change the moment a pattern is scanned.

Paperless process

No paper notes and no later data entry.
