CASE STUDY · SHOPFLOOR DIGITALIZATION

Weld Rod Capture Digitalization

A centralized controller master for accurate welding item–grade mapping, integrated with SAP.

From shopfloor scan-out to SAP

01

Scan out

Operator completes the job on the shopfloor.

→

02

Enter rod usage

Operator must enter welding or gouging rod details.

→

03

Auto-save

Entry is saved automatically as consumption.

→

04

SAP integration

Consumption is posted to SAP through an API.

Operator screen: Welding & Gouging details

Welding rod

Select thickness, electrode and quantity.

Gouging rod

Select thickness, electrode and quantity.

Multilingual

Language toggle for English, Hindi and Tamil.
